INTERNATIONAL FINANCIAL REPORTING 2770		
2023 - 2024	Credit : 3	IESEG - School of Management
Class code :	2324_SYL_ACC_2770	ACC

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

This course is intended as a follow-up on an introductory class on Financial Accounting. Prerequisites for the current course are a good understanding of the accounting information system and of the content and format of financial statements.

Learning objectives

When finishing this course students should be able to read and understand financial statements more in detail and especially extract information that is relevant in interpreting the intercompany investments. The student should also be able to run analyses similar as what was done in class, and build a conclusion with regard to strategic decisions that a company can take.

- 1.A Demonstrate an international mindset
- 1.C Communicate effectively in English
- 5.B Construct expert knowledge from cutting-edge information
- 6.A Thoroughly examine a complex business situation

Course description

Companies increasingly invest in other companies to make a return, to grow or to face competition, both nationally and internationally. These investments are shown in companies' financial statements. How they are reported and presented can however be very different and heavily depends on the size and the aim of the investment. It is the goal of this course to show the different reporting formats, to explain concepts that are important in the context of intercompany investments like intangible assets and impairment testing and to illustrate some computations. The course is a good preparation for students that are interested in firm valuation and corporate finance. Note that the course is set up from a readers' perspective, without the technicalities of debit and credit, so a basic understanding of financial statements should do.

Topics covered during this course:

1. Understanding financial statements
2. Minority passive investments
3. Minority active investments
4. Controlling investments
5. Intangible assets
6. Impairment testing

Assessment / Feedback

Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14
---------------	---	---	---	---	---	---	---	---	---	----	----	----	----	----

Type of test	Participation	Group project	End of term exam											
Nb of hours if written exam			2.0											
2nd session														
Coefficient	15.0	35.0	50.0											

Evaluation

Students are required to actively participate during the course. This will be asked to comment and answer on assigned cases and they will have to prepare a group presentation on the red line case of the course. Feedback will consist of in class advice, recommendations on additional material/practice. For feedback on the final exam, students can contact the professor to get more details on their performance.

INTERNATIONAL FINANCE 2771		
2023 - 2024	Credit : 3	IESEG - School of Management
Class code :	2324_SYL_FIN_2771	FIN

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

None.

Learning objectives

At the end of the course, the student should be able to understand

- the importance of multinational transactions
- international monetary arrangements and balance of payments
- how foreign exchange rates are determined
- foreign exchange risk management

- 1.A Demonstrate an international mindset
- 5.B Construct expert knowledge from cutting-edge information
- 6.A Thoroughly examine a complex business situation
- 1.C Communicate effectively in English
- 6.B Synthesize multifaceted information from various sources across different functional fields
- 6.C Combine different skills and management disciplines in support of interdisciplinary responsibilities

Course description

This course aims to provide students with knowledge of international finance and help them develop skills to properly handle FX securities in a global environment. Topics include FX markets, international monetary arrangements, foreign exchange rates parities, determinants of exchange rates, FX derivatives, as well as FX risk management.

Assessment / Feedback														
Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14

INTERNATIONAL HRM 2769		
2023 - 2024	Credit : 3	IESEG - School of Management
Class code :	2324_SYL_HRM_2769	HRM

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Students have successfully taken the introductory course in HRM.

Learning objectives

- Understand the complexity deriving from managing people in a multinational company.
- Comprehend the aim of and applied HRM tools and the different approaches that multinational companies might adopt.
- Properly and ethically use the main methodologies related to every HR operational system in an international context.

- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 2.B Solve professional dilemmas using concepts of CSR and ethics
- 3.A Breakdown complex organizational problems using the appropriate methodology

Course description

The International HRM course is centred on how MNCs manage expatriates in dealing with trans-national operations. In particular, the course is built around the following HRM operational systems: staffing, recruitment and selection, performance assessment, compensation, and training.

Assessment / Feedback

Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Type of test	Group project	Participation	Individual project											
Nb of hours if written exam														
2nd session			true											
Coefficient	30.0	15.0	55.0											

Evaluation

The feedback to be provided to students is indeed meant to reinforce their team based and individual learning process and related performances. Providing formal and written feedback to each student is of great importance for the effectiveness of the learning process of students. It is suggested to provide to students three levels of feedback:

1. (Optional) A general written feedback to the entire cohort in which the overall trend of the class is synthesized in relation to each dimension of the assessment system;
2. A specific written feedback related to the teamwork tasks (in addition to the oral feedback given during the presentation);
3. A specific written feedback related to the individual assignment.

Finally, students are invited to contact their instructor in order to plan a meeting if necessary.

GLOBAL BUSINESS LAW 2773		
2023 - 2024	Credit : 3	IESEG - School of Management
Class code :	2324_SYL_LAW_2773	LAW

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Basic understanding of any legal system (sources, persons, contracts, torts).

Learning objectives

At the end of the course, the student should be able to:

Understand the international legal environment of business.

Know how to use international contracts strategically, identify key contractual clauses and spot red flags.

Be able to select the most appropriate method to settle transnational disputes.

- 1.A Demonstrate an international mindset
- 2.B Solve professional dilemmas using concepts of CSR and ethics
- 3.B Propose creative solutions within an organization
- 4.C Convey powerful messages using contemporary presentation techniques
- 5.B Construct expert knowledge from cutting-edge information

Course description

1. The international legal environment of business: main actors and institutions. Private International Law. Public International Law. International Trade Law. Transnational law.
2. Business risks and legal implications to enter foreign markets. Different entry strategies.
3. Comparative Law. What do legal families have to do with doing business? Empirical comparative law.
4. International contracts. How to negotiate, draft and interpret international contracts. The CISG. The Incoterms. Letters of credit.
5. EU Law. The internal market. EU Private International Law. The Rome I Regulation.
6. Methods for solving transnational business disputes. ADR. International Business and Investment Mediation and Arbitration. Enforcing foreign decisions and awards

GLOBAL BRAND MANAGEMENT 0668		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_MKT_0668	MKT

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

The student should have basic knowledge in marketing and show an interest in global brand management.

Learning objectives

At the end of the course, the student should be able to :

Master the basic concepts and theory for planning, implementing, and evaluating global management strategies.

Effectively design brand elements.

Develop a clear brand positioning strategy and architecture.

Know how to enhance brand equity from both a financial and consumer perspective.

Master the basic brand communication tools.

Draft a clear and effective global brand management strategy.

- 6.B Synthesize multifaceted information from various sources across different functional fields
- 5.D Make effectual organizational decisions
- 5.B Construct expert knowledge from cutting-edge information
- 4.C Convey powerful messages using contemporary presentation techniques
- 1.A Demonstrate an international mindset
- 1.C Communicate effectively in English
- 3.B Propose creative solutions within an organization
- 6.A Thoroughly examine a complex business situation

Course description

This course presents an introduction to global brand management. The topics covered in class include an introduction to brands and brand management, the brand elements, brand positioning, brand architecture, customer-based brand equity, brand image and personality, brand marketing and communication as well as the global brand strategy. In addition to lectures, the course consists of (video) case studies, in which students will have to critically apply the concepts discussed in class and propose their own solutions to the various real-life problems and/or situations. Last but not least, students will be asked to demonstrate their knowledge based on a short MCQ exam. An active, interactive, and critical approach is fundamental for this course.

INTERNATIONAL SUPPLY CHAIN MANAGEMENT AND LOGISTICS 2767		
2023 - 2024	Credit : 3	IESEG - School of Management
Class code :	2324_SYL_OPS_2767	OPS

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

An understanding of the foundations of business administration and economics is expected.
 Knowledge acquired in a basic course of operations management.
 Presentation skills.

Learning objectives

The objective of this course is to provide a solid understanding of the structures, interconnections, concepts, challenges and opportunities of international supply chains and logistics, as well as of the dynamics of their environment and their management.

Students are able to analysis of supply chains and design concepts for supply networks, ensuring their sustainability and resilience, via profitability, reliability, and adaptability.

Furthermore, students evaluate the impact of digitalisation on supply chain management and logistics. They are can identify opportunities of its successful integration for the optimisation of efficiency and sustainability.

Students analyse complex supply chains and networks, develop innovative solutions, and evaluate these innovations from a systemic perspective.

- 3.A Breakdown complex organizational problems using the appropriate methodology
- 3.B Propose creative solutions within an organization
- 4.C Convey powerful messages using contemporary presentation techniques
- 6.B Synthesize multifaceted information from various sources across different functional fields

Course description

The environment of production and distribution is more and more fickle and challenging for organisations, as recent developments such as the COVID pandemic and the Brexit have shown. The implications on supply chains and logistics were significant, ranging from shortage in raw materials and logistics staff, to disruptions of supply chains due to different rules and regulations. As a consequence, corporates are challenged to reconsider their supply chains, which are often international.

How to ensure production and delivery to customers in challenging and disruptive circumstances?

Do product portfolios have to be adjusted or production strategies?

And how to integrate the growing need to meet sustainability targets?

Answering these questions requires know-how, agility and an open mind, analytical skills and a systemic perspective.

Therefore, the objective of this course is to provide a solid understanding of the structures, interconnections, concepts, challenges and opportunities of international supply chains and logistics, as well as of the dynamics of their environment and of their management.

This includes the analysis of supply chains, their design and planning, ensuring their sustainability and resilience, via profitability, reliability and adaptability. This also includes the development of a thorough understanding of the impact of digitalisation on supply chain management and logistics and the identification of its successful integration for the optimisation of efficiency and sustainability.

The Teaching and Learning Strategy of the seminar is focusing on a balanced mix of development of know-how and practical applications. Therefore, self-studying in preparation for the seminars will be complemented with case studies, analysis of real-life supply chains and, subject to confirmation, a logistics site visit as integrative part of the seminar. The seminar is backed by a systemic approach, therefore integrating supply chain management and logistics into the context of organizational structures, including the interrelation to other areas such as operations, organisation management, marketing, finance, product development, etc.

INTERNATIONAL BUSINESS STRATEGIES 2772		
2023 - 2024	Credit : 3	IESEG - School of Management
Class code :	2324_SYL_STS_2772	STS

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Prior to class you are expected to read the assigned case studies, articles
 All course materials will be available on IESEG online (IO).

Learning objectives

Identify and understand major trends and transformations affecting international business and strategy.
 Apply to real organizations theoretical frameworks and models.
 Audit a firm's global strategy and positioning, synthesize its organizational capabilities and assess its competitive advantage and performance.
 Solve complex organizational issues and make realistic recommendations

- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 2.A Assess the values of the organization in which they work
- 2.B Solve professional dilemmas using concepts of CSR and ethics
- 3.A Breakdown complex organizational problems using the appropriate methodology
- 3.B Propose creative solutions within an organization

Course description

The current business context is characterized by uncertainty and constant disruption. In the face of continuous technological change, a climate crisis, increasing inequalities, and global competition, organizations need to rethink the way they do business internationally. The course is designed to immerse students into the theory and practice of Global Strategy in a world of relentless disruption. The course will address the fundamentals of international strategy as well as more recent trends. It will provide a set of tools and frameworks to identify major environmental shifts that affect industries, analyze opportunities and strategies for international expansion, audit organizational capabilities, and assess the sustainability of international strategies. Participants will learn by applying theoretical frameworks and through readings, discussions, debates, short lectures, case studies and presentations.

CORPORATE FINANCIAL REPORTING & BUSINESS ENVIRONMENTS 2794		
2023 - 2024	Credit : 6.0	IESEG - School of Management
Class code :	2324_SYL_ACC_2794	ACC

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

This course is intended as a follow-up on introductory classes on Financial Accounting and Financial Analysis. Prerequisites for the current course are a good understanding of the accounting information system and of the content and format of financial statements. The course is especially designed to equip students wishing to major in accounting and/or finance and that have the ambition to consult business on financial reporting environments.

Learning objectives

At the end of the course, you are expected to master the following technical aspects of financial reporting:

Know how to journalize (Debit/credit);

- Understand and apply all the steps of the accounting cycle, including preparation of three different trial balances (unadjusted, adjusted and post-closing balances)
- Understand and apply the indirect method of preparing cash flow statements;
- Know the concept of Value Added Taxes (VAT)

In addition, students should be able to read and understand financial statements of typically larger companies/groups and especially extract information that is relevant for corporate stakeholders and financial intermediaries like investors, financial analysts, credit analysts, auditors, regulators, management, and tax professionals.

- 1.A Demonstrate an international mindset
- 5.B Construct expert knowledge from cutting-edge information
- 6.A Thoroughly examine a complex business situation

Course description

Companies invest substantially in financial reporting formats, software and technically skilled personnel to produce high quality financial statements that deliver a true and fair view of the financial position to corporate stakeholders. The current course is a comprehensive journey into the preparation process of these financial statements and gives detailed insights in how various stakeholders benefit from high-quality reports and interpretation.

Selected topics covered during this course:

Part I

1. Understanding financial statements
2. Mastering financial input functions
3. Mastering details of the accounting cycles

Part II

4. Financial analysts and financial reporting
5. Institutional investors and financial reporting
6. Auditors and financial reporting
7. The tax function and financial reporting

Assessment / Feedback

CHALLENGES AND PERSPECTIVES OF THE EUROPEAN CONSTRUCTION 2759		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_DEV_2759	DEV

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Be curious!

Learning objectives

To understand the mechanisms of the EU, the challenges and threats to European integration in a globalisation that seems less and less controlled and questioned.

- 1.B Successfully collaborate within a intercultural team
- 1.A Demonstrate an international mindset
- 5.A Predict how business and economic cycles could affect organizational strategy
- 5.B Construct expert knowledge from cutting-edge information
- 6.B Synthesize multifaceted information from various sources across different functional fields

Course description

- The aim of the course is to provide students and future executives with a reading grid of Europe, to allow them to apprehend it in its globality:
- The objective of this course is also to make students aware that the space, which surrounds the business world, remains subject to multiple risk factors: political, socio-cultural and environmental...

Course outline:

I/ The Brexit reveals European failures

II/Europe facing the populist challenge Which way to choose between Viktor Orban's illiberalism and Emmanuel Macron's powerful Europe?

III/ What place for Europe in a world in tension (?) -The Russian-Ukrainian War, translation of the war between European soft power and Russian hard power - Xi Jin Ping's "Chinese dream", Europe's nightmare? - The challenge of European trade relations at a time of "deglobalisation".

IV/ Europe at the time of the Green Deal, the challenge of energy between energy transition and geopolitical challenge, intervention of an expert of Euratom and former student of IESEG!

Assessment / Feedback														
Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Type of test	Participation	End of term exam	Presentation											

Nb of hours if written exam	0.5	1.0												
2nd session														
Coefficient	20	50	30											

Evaluation

The evaluation will be both summative and formative. Ongoing monitoring will take place in the penultimate session. It is not really an MCQ, it prepares the final evaluation by verifying the acquisition of the key concepts of this course. An answer key will be posted online after the evaluation.

GEOGRAPHY AND CLIMATE CHANGE: EVOLUTION AND PERSPECTIVES 2783		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_DEV_2783	DEV

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

None

Learning objectives

None

- 1.A Demonstrate an international mindset
- 1.C Communicate effectively in English
- 2.C Generate sustainable solutions for organizations
- 4.C Convey powerful messages using contemporary presentation techniques
- 5.B Construct expert knowledge from cutting-edge information

Course description

Plan of the seminar

1. Introduction to Climate Change and Geography
 - Overview of the seminar and of validation works
 - Geography and its key concepts (e.g. physical geography, human geography, geopolitics, geoeconomics).
 - Climate Change / Global Warming and its key concepts (e.g. climate vs. weather, carbon dioxide, methane, greenhouse gas, albedo effect, fossil fuels, low-carbon energies, global average temperature, global warming, sea-level rise, tipping points).
2. What is happening to Earth? A comprehensive review of IPCC reports

Content:

 - The physical science basis of Climate Change / Global Warming measurements and projections (IPCC 2021 1st report)
 - Impacts, Adaptation and Vulnerability (IPCC 2021 2nd report)
 - Possible political actions to mitigate Climate Change / Global Warming during the 21st century (IPCC 2021 3rd report)
 - Case study: Climate change in Bangladesh

Suggested readings:

IPCC, Climate Change 2021: The Physical Science Basis, Summary for Policymakers (final version), 2021.
 IPCC, Climate Change 2022: Impacts, Adaptation and Vulnerability, Summary for Policymakers, 2022.
 IPCC, Climate Change 2022: Mitigation of Climate Change, Summary for Policymakers, 2022.
3. Geopolitical consequences of Global Warming

Content:

 - Worldwide state on play and forecast on resource shortages, climate refugees, failed States, wars on

resources, and political shift towards authoritarian democracies.

- Case study: forecasted wars on resources across the globe

Suggested readings:

Satterthwaite, D. (2011). How urban societies can adapt to resource shortage and climate change.

Philosophical Transactions of the Royal Society A: Mathematical, Physical and Engineering Sciences, 369 (1942), 1762-1783.

Sending, O. J., Øverland, I., & Hornburg, T. B. (2019). Climate change and international relations. *Journal of International Affairs*, 73(1), 183-194.

Hinkkainen Elliott, K., & Kreutz, J. (2019). Natural resource wars in the shadow of the future: Explaining spatial dynamics of violence during civil war. *Journal of peace research*, 56(4), 499-513.

4. Can we stop using fossil fuels?

Content:

- Fossil fuels, energy transition, low-carbon energy, industrial and agricultural degrowth, sustainable cities, clean transportation.

- Case study: the nuclear power debate in Japan

Suggested readings:

Newell, P., & Simms, A. (2020). Towards a fossil fuel non-proliferation treaty. *Climate Policy*, 20(8), 1043-1054.

York, R., & Bell, S. E. (2019). Energy transitions or additions?: Why a transition from fossil fuels requires more than the growth of renewable energy. *Energy Research & Social Science*, 51, 40-43.

Zeppini, P., & Van Den Bergh, J. C. (2020). Global competition dynamics of fossil fuels and renewable energy under climate policies and peak oil: A behavioural model. *Energy Policy*, 136, 110907.

5. Can we stop factory farming / industrial animal agriculture?

Content:

- Impact of animal agriculture on greenhouse gas, vegetarianism, veganism, animal rights, arable land scarcity.

- Case study: the 2022 worldwide food crisis

Suggested readings:

McCarthy, J., & Zen, Z. (2010). Regulating the oil palm boom: assessing the effectiveness of environmental governance approaches to agroindustrial pollution in Indonesia. *Law & Policy*, 32(1), 153-179.

Cooper, L. L. (2018). A new veganism: How climate change has created more vegans. *Granite: Aberdeen University Postgraduate Interdisciplinary Journal*, 2(1), 16-24.

Rosi, A., Mena, P., Pellegrini, N., Turrone, S., Neviani, E., Ferrocino, I., ... & Scazzina, F. (2017). Environmental impact of omnivorous, ovo-lacto-vegetarian, and vegan diet. *Scientific reports*, 7(1), 1-9.

6. Is Neo-Malthusianism an option?

Content:

- Overpopulation, overconsumption, demographic degrowth, birth control, birth control policies, demographic collapse.

- Case studies: India's green revolution and China's birth control policies

Suggested readings:

Lerner, A. B. (2018). Political neo-Malthusianism and the progression of India's green revolution. *Journal of Contemporary Asia*, 48(3), 485-507.

Maja, M. M., & Ayano, S. F. (2021). The impact of population growth on natural resources and farmers' capacity to adapt to climate change in low-income countries. *Earth Systems and Environment*, 5(2), 271-283.

Madsen, J. B., Robertson, P. E., & Ye, L. (2019). Malthus was right: Explaining a millennium of stagnation. *European Economic Review*, 118, 51-68.

7. Collapsology: are we headed to a post-apocalyptic world?

Content:

Collapsology, ecosystem collapse, Theory of Hothouse Earth, cognitive bias, ecological denial, eco-anxiety.

Suggested readings:

Bland, L. M., Rowland, J. A., Regan, T. J., Keith, D. A., Murray, N. J., Lester, R. E., ... & Nicholson, E. (2018). Developing a standardized definition of ecosystem collapse for risk assessment. *Frontiers in Ecology and the Environment*, 16(1), 29-36.

Lenton, T. M., Rockström, J., Gaffney, O., Rahmstorf, S., Richardson, K., Steffen, W., & Schellnhuber, H. J. (2019). Climate tipping points—too risky to bet against.

8. Students' works part 1

- Individual case studies and collective works (all of them) are submitted in writing to the teacher

- Some groups give their final oral presentation to the class
9. Students' works part 2
- The remaining groups give their final oral presentation to the class
 - General conclusion of the seminar: an open interactive debriefing by students and the teacher

Interactive courses	13
Directed work	3.0
Personnal work	10
Collective project	14
Individual project	10
Total	50

Validation works:

- Individual work: a case study of a specific and precise issue (e.g. "Geopolitical impact of melting Arctic Ice", "Worldwide resource scarcity"). Submitted in writing to the teacher at the beginning of session 8. 1/3 of the final grade.
- Collective work (6 groups of around 5 members each): imagine every thinkable solution to a given worldwide ecological issue. Use as many concepts and theories of the seminar as possible (e.g. low-carbon energies, degrowth). Submitted in writing to the teacher at the beginning of session 7, and orally presented

as a 20 to 30-minute presentation during sessions 7 and 8. 1/3 of the final grade.

- Final test: a 2-hour long short essay on a single topic chosen by the teacher. 1/3 of the final grade.

GLOBAL BUSINESS ENVIRONMENT 2780		
2023 - 2024	Credit : 6.0	IESEG - School of Management
Class code :	2324_SYL_ECO_2780	ECO

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Introductory courses in Macroeconomics and Microeconomics

Learning objectives

Understand the economic environment in which businesses are conducted

- 5.C Employ state-of-the-art management techniques
- 6.C Combine different skills and management disciplines in support of interdisciplinary responsibilities
- 2.B Solve professional dilemmas using concepts of CSR and ethics
- 2.C Generate sustainable solutions for organizations
- 1.A Demonstrate an international mindset
- 1.C Communicate effectively in English
- 5.A Predict how business and economic cycles could affect organizational strategy

Course description

The course is comprised of four sections:

Section 1 : International Trade and Investment (4 sessions) – teacher: Joseph Bitar

- Session 1 : Introduction to international trade
- Session 2 : Absolute and comparative advantages
- Session 3 : The HOS Model
- Session 4 : Economies of scale and intra-industry trade

Section 2: International Economic Integration and International Business (4 sessions) – teacher: Joseph Bitar

- Session 1 : Protectionism theory
- Session 2 : Trade agreements and organizations
- Session 3 : The “Standard Trade Model” and the terms of trade
- Session 4 : First Solar case study

Section 3: Monetary Economics, Central Banking and Financial Economics (4 sessions) – teacher: Joseph Bitar

- Session 1: Introduction to Money, interest rates and financial markets (1)
- Session 2 : Introduction to Money, interest rates and financial markets (2)
- Session 3 : Introduction to Central Banking
- Session 4: Group projects on: unconventional monetary policy; central bank communication; the asset prices transmission channel of monetary policy; crypto assets, CBDC

Section 4: Economic Growth and the Conjuncture Cycle (4 sessions) – teachers: Marianne Guyot (Lille) and Rabih Zotti (Paris)

- Session 1: Introduction to economic conjuncture cycles and to the Problem Based Learning (PBL)

method

- Session 2 : Economic cycles theory and conjuncture (using PBL)
- Session 3 : Economic growth theories (using PBL)
- Session 4 : Shocks and economic crises - response mechanisms (using PBL)

STRATEGY AND ORGANIZATION OF INNOVATION 2742		
2023 - 2024	Credit : 6.0	IESEG - School of Management
Class code :	2324_SYL_ENT_2742	ENT

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Understanding of introductory concepts in strategic management and organization

Learning objectives

- 3.A Breakdown complex organizational problems using the appropriate methodology
- 3.B Propose creative solutions within an organization

Course description

This course is organized in two main components: Strategy of Innovation and Organization of Innovation. The first part is intended to provide students with practical skills to understand, evaluate, create, and ultimately manage an effective innovation strategy within an organization. In the second part students are confronted with the internal perspective of organizing for innovation in an open, multi-actor and digitally-mediated world. The course will provide insights on organizing and orchestrating collectives of actors within and outside the organization for effective innovation and value creation. This will include a perspective on organizing for innovation with teams, with digital technologies, platforms, and infrastructures, as well as discuss effective strategies for business innovation with different forms of open organizing such as crowds and communities.

The students will have the opportunity to appreciate the relevant skills to manage innovation using examples of main leading international firms. We will make use of several materials such as books, case studies, articles, a simulation, a practitioner talk, and sources in the public domain.

The sessions are structured in the following way:

1. Strategy of Innovation
 - a) Introduction, typologies of innovation as well as industry dynamics
 - b) Innovation strategy
 - c) Collaboration strategy for innovation
 - d) Regional aspects of innovation, such as ecosystems and clusters
2. Organization of Innovation
 - a) Different forms of innovative organization with teams
 - b) Organizing for innovation with digital technologies and platforms
 - c) Orchestrating for innovation at digital infrastructures of multiple actors
 - d) Organizing for innovation with communities
 - e) Organizing for innovation with crowds and in sharing economy

Assessment / Feedback

Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Type of test	Presentation	Individual report	Participation											
Nb of hours if written exam														
2nd session														
Coefficient	40.0	40.0	20.0											

Evaluation

The course uses participation as a form of continuous assessment as well as group and individual work. Students receive individual feedback on class participation and written work. Feedback on the group presentation is at the group-level in written form.

PRACTISING 360 DEGREE INNOVATION 2735		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_ENT_2735	ENT

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

None

Learning objectives

Assess and identify improvements to commonly encountered systems, products, and processes.
 Create upon demand a written design brief for the improvement of a system, product, or process.
 Appreciate through direct engagement both the "push" and "pull" aspects of sociotechnical improvements to the human-designed world.
 Engage in discerning critique of proposed improvements by others to existing systems, products and/or processes.

- 1.C Communicate effectively in English
- 4.A Appraise the performance of a team
- 4.B Compose constructive personal feedback and guidance
- 3.B Propose creative solutions within an organization

Course description

Students will engage in practical innovation beginning with recognizing everyday examples from around the world - both past and present. Business examples in the local community will be accessed in proximity to IESEG. Randomly assigned teams will identify an innovation site of their choosing within a given radius of the school. They will commission an innovation design for another team. All teams will serve as both a consulting team completing an assigned task from another team and as a customer team who have requested an innovation. All teams will judge at least two other teams' products, grading both individual students within their own team and grading others at the team-level only. Note: There are only two brief lectures by the professor during this course. All other course content is generated by student teams.

Assessment / Feedback														
Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Type of test	Group project	Individual report												
Nb of hours if written exam														
2nd session														

Coefficient	85	15												
-------------	----	----	--	--	--	--	--	--	--	--	--	--	--	--

Evaluation

Most of the work throughout the course is undertaken in assigned teams. Individual teams are required to interact with other assigned teams in the course of completing various assigned tasks. Work is turned into the instructor (and shared with their own team or other teams as appropriate) on a daily basis. The instructor circulates continuously providing both individual and team coaching as needed. Students are limited to using resources in the carefully curated set of resources within IESEG online for this course. The instructor retains half of the 85% of the student's grade for group projects and the students collectively provide the other half of the 85%. The 15% individual report is held entirely by the professor.

HOW TO SETUP AN ONLINE BUSINESS 2778		
2022 - 2023	Credit : 2.0	IESEG - School of Management
Class code :	2223_SYL_ENT_2778	ENT

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

None

Learning objectives

The theories and concepts will be applied practically for building your online business.

Below are the main themes, but the order will be different during the course, as we will mix theory and practice

High-level perspective

- Economics of online businesses, case study of existing firms, and the future of internet (e.g. AI)
- Different online start-ups strategies and theories supporting them
- Business models of emerging new companies (e.g. industry 4.0) and already established online companies (google, amazon, facebook, apple, etc.)

Designing your online business

- Knowledge of your industry and of your customers
- Establishing a business model and its cash-flow

Introduction to specific skills necessary to implement an online business

- A/B testing
- Web-marketing social media, emailing and SEO
- Ethics of using cognitive biases in your online business

- 5.B Construct expert knowledge from cutting-edge information
- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 2.C Generate sustainable solutions for organizations
- 3.A Breakdown complex organizational problems using the appropriate methodology
- 3.B Propose creative solutions within an organization
- 5.A Predict how business and economic cycles could affect organizational strategy

Course description

Understand the online economy from a high-level perspective (economics, main actors, business models)

Design an online business (industry, products, business model) and a cash flow model.

Master or have a good understanding of the specific skills required to implement and set-up an online business (Artificial intelligence, A/B Testing, digital and social marketing, ethics)

Have a practical experience of creating a website (html, introduction to php, wordpress, photo, video, selling, etc.)

Understand the ethics of using cognitive biases

Assessment / Feedback

ENTREPRENEURIAL DECISION MAKING 2788		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_ENT_2788	ENT

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Students should have at least three business idea.

Learning objectives

1.A & 1.B : group work in international teams using decision making (DM) tools and techniques
 2A : Evaluating the value of using decision making tools and processes within an organization
 2B : Ethical impact of behavioral economics (e.g. psychological manipulation using decision biases)
 2C : applying the decision making tools to solve entrepreneurial issues (e.g. understanding entrepreneurial overconfidence and its impact on launching a business)
 3A : applying entrepreneurial decision making tools and techniques to solve organization problems (e.g. improving the efficiency of group decision making using the technique of "the red team")
 3B : Combining various decision making tools and techniques to creatively improve entrepreneurial decision making and sort through various solutions
 3C : Using decision making tools to improve change management processes
 4A : Use personality types to improve the performance of a team
 4C : Various presentations and interactions during the course to improve the impact of communicating powerful messages
 5A : Use decision making tools and techniques related to historical analysis to help predict how business and economic cycle are influencing organizations.
 5B : Incorporating cutting-edge information in the entrepreneurial decision making process (e.g. use of AI)
 5C : Many state-of-the-art papers will be studied during this course.
 5D : Understanding effectuation as an entrepreneurial decision making technique.
 6A : Using entrepreneurial decision making tools and techniques, as well knowledge of cognitive biases to examine complex business situation
 6B : Understanding how looking at situations from different angles helps to improve entrepreneurial decision making. The entrepreneurial DM tools and techniques are the most powerful when used in combination.

- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 2.A Assess the values of the organization in which they work
- 2.B Solve professional dilemmas using concepts of CSR and ethics
- 2.C Generate sustainable solutions for organizations
- 3.A Breakdown complex organizational problems using the appropriate methodology
- 3.B Propose creative solutions within an organization
- 3.C Organize change management processes
- 4.A Appraise the performance of a team
- 4.C Convey powerful messages using contemporary presentation techniques

- 5.A Predict how business and economic cycles could affect organizational strategy
- 5.B Construct expert knowledge from cutting-edge information
- 5.C Employ state-of-the-art management techniques
- 5.D Make effectual organizational decisions
- 6.A Thoroughly examine a complex business situation
- 6.B Synthesize multifaceted information from various sources across different functional fields
- 6.C Combine different skills and management disciplines in support of interdisciplinary responsibilities

Course description

The following questions will be treated :

- The relationship between personality and intuition?
- Training the brain and the “expert intuition”
- How and when entrepreneurs are reporting using their intuition?
- Under which circumstances intuition can be used?
- When analytical reasoning should be used compared to intuition?
- Using grounded theory and conceptualization for better entrepreneurial decision making
- In-depth discussion on the study of cognitive biases in entrepreneurship
- Developing a rational business model.

FUNDAMENTALS OF FINANCIAL DERIVATIVES 0205		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_FIN_0205	FIN

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	

Prerequisites

Fundamentals of Financial Markets:

- Basic notions of financial mathematics (e.g. discounting, compounding, present value of cash flows)
- Basic knowledge of primary financial assets (shares/stocks, bonds)

For the group project, the management of basic statistical knowledge and/or classic regression analysis is highly recommended.

Learning objectives

The course targets the understanding of general principles of derivatives markets by focusing on the following key points:

- The objective of this course is to provide basic knowledge about most used derivatives (e.g. common financial derivatives products). Such knowledge deals with the nature of derivatives, usage and also implications for regulation and related regulatory changes. The focus is globally set on derivatives as well as their use for debt management.
- The understanding of derivatives market starts from the diversity of derivatives traders and their different motives for trading such derivatives.
- Moreover, major derivatives instruments are introduced as well as their interest to risk management. In this light, the hedging properties of derivatives and related possible arbitrage opportunities are highlighted. However, derivatives are also subject to specific risks that investors or derivatives traders should notice.

MORE SPECIFICALLY:

At the end of the course, students should have knowledge about the:

1. Mechanisms of the most used derivatives: futures, forwards, options and swaps;
2. Broad principles of derivatives' valuation and related speculative/hedging use: advantages and disadvantages of those financial assets and their corresponding risk;
3. Elaboration of simple computer-based tools (e.g. Excel) to manage/report derivative positions (among which signaling tools).

- 5.A Predict how business and economic cycles could affect organizational strategy
- 6.B Synthesize multifaceted information from various sources across different functional fields
- 5.B Construct expert knowledge from cutting-edge information

Course description

The derivatives lectures will be split across approximately 6 sessions which are organized as follows:

- Lecture 1: Introduction, and institutional aspects of futures and forward contracts (2 sessions).
- Lecture 2: Determination of forward and futures prices, and hedging strategies using futures (no arbitrage)

- principle)
 contracts (1 session).
 - Lecture 3: Swaps (1.5 sessions).
 - Lecture 4: Options markets, trading strategies, and exotic options (1.5 sessions).

The course will be composed of classic lectures with well-chosen case studies, up to date real life examples, as well as immediate applications using Excel and a group project to help students learn and evolve so as to acquire a professional mindset.

BANKING, INSURANCE AND REGULATION 2757		
2023 - 2024	Credit : 6.0	IESEG - School of Management
Class code :	2324_SYL_FIN_2757	FIN

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

None.

Learning objectives

At the end of the course, the student should be able to:

1. understand in detail what a bank is through its annual reports for banks or insurances companies.
 2. to know the European authorities (regulation) after the financial crisis of 2008
 3. understanding the 2008 crisis to better understand banking regulation in Basel 3 and in Solvency 2.
 4. understand the challenges of micro-prudential and macro-prudential regulation.
 5. understand what is called capital (associated criteria) and its main function (loss absorption).
 6. understand capital ratios (risk-based, leverage ratio)
 7. have a global view of the Bale 3 system
 8. understand in detail the role of buffers and know how to calculate some of them.
 9. understand what a stress test is
- 1.C Communicate effectively in English
 - 6.A Thoroughly examine a complex business situation
 - 1.A Demonstrate an international mindset

Course description

The course presents the two main financial regulated sectors Banking and Insurance, their actors, their economic drivers, their risks and the regulatory framework in which they operate

DATA ANALYTICS AND VISUALIZATION FOR FINANCE 2793		
2023 - 2024	Credit : 6.0	IESEG - School of Management
Class code :	2324_SYL_FIN_2793	FIN

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

- Basic knowledge of MS Excel
- Basic knowledge of mathematics and statistics
- Basic knowledge of business/management and finance
- Strong interest for statistical programming
- Strong interest for computational finance
- Strong interest for computer science
- Analytical thinking and decision-making

Learning objectives

The course provides learners with "formation" and "skills on

- Understanding data types, forms and structures
 - Improving data-driven quantitative skills in finance
 - Gaining applied knowledge of basics of financial forecasting
 - Developing critical thinking competency based on data
 - Learning how to develop/communicate managerial decisions with data
 - Acquiring (hands-on) learning experience via MS Excel and R software
-
- 1.A Demonstrate an international mindset
 - 1.B Successfully collaborate within a intercultural team
 - 1.C Communicate effectively in English
 - 3.A Breakdown complex organizational problems using the appropriate methodology
 - 3.B Propose creative solutions within an organization
 - 4.A Appraise the performance of a team
 - 4.C Convey powerful messages using contemporary presentation techniques
 - 5.D Make effectual organizational decisions
 - 6.A Thoroughly examine a complex business situation

Course description

This course provides students with an introduction to data visualization and analytics with a particular focus on financial applications as well as managerial practices. Covering managerial practices from both corporate finance and financial markers/services side, the course aims at providing learners with necessary formation and various essential skills on data visualization and analytics.

The course will cover the following topics:

- Portfolio Diversification and Efficient Frontier
- Volatility Analytics and Visualization using R
- Extreme Risk Analytics and Visualization using R
- Portfolio Analytics using R
- Performance Analytics using R
- Technical Analysis
- Data Analytics and Visualization for Corporate Finance
- Data Analytics for Insider Trading

The course requires high level of continuous working outside the course hours, which will in turn help achieve the learning objectives particularly in terms of skill acquisition.

INTRODUCTION TO ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING FOR FINANCE 2720		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_FIN_2720	FIN

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

This course is a soft overview of the vast body of materials on machine learning and artificial intelligence that have proven to have a significant practical value. It does not assume any high level of mathematical training, or even programming experience, but requires basic statistical knowledge. The content of the course being practically oriented, basic concepts of Finance and Economics are required.

Learning objectives

1. Overview of Machine Learning and Artificial Intelligence in day-to-day life.
2. Fundamental Supervised Learning algorithms with case studies (with a focus on classification methods)
3. Fundamental Unsupervised Learning algorithms with case studies
4. Some words on Artificial Neural Network and Deep Learning
5. Best practice in Data Science
6. Concrete AI applications (in class and group project)

- 5.A Predict how business and economic cycles could affect organizational strategy
- 5.B Construct expert knowledge from cutting-edge information
- 6.A Thoroughly examine a complex business situation
- 6.C Combine different skills and management disciplines in support of interdisciplinary responsibilities

Course description

This course is designed to provide an overview of machine learning and artificial intelligence approaches (mainly for classification) and to demonstrate how those techniques are applied in decision making.

The course will conclude with some open discussions regarding the future of ML/AI in industry and society in general.

Assessment / Feedback

SUSTAINABLE CORPORATE GOVERNANCE 2743		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_FIN_2743	FIN

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Knowledge of basic concepts in Economics, Finance and Management.

Learning objectives

At the end of the course, students will be able to :

- Discuss obstacles and opportunities for Sustainable Corporate Governance in line with UN Sustainability Development Goals (SDGs) and EU sustainable corporate governance initiative of 2021
- Connect sustainability to business models, their competitive position, strategy, and value drivers.
- Understand the principles of responsibility and long-term value creation
- Understand the principles of multiplication, comparative advantage and materiality for making sustainable investment choices
- Understand the principles of sustainable executive compensation
- Understand the controversies surrounding the share buy-backs and principles of responsible pay-out.

- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 1.C Communicate effectively in English
- 2.A Assess the values of the organization in which they work
- 2.B Solve professional dilemmas using concepts of CSR and ethics
- 2.C Generate sustainable solutions for organizations
- 3.A Breakdown complex organizational problems using the appropriate methodology
- 3.B Propose creative solutions within an organization
- 3.C Organize change management processes
- 4.B Compose constructive personal feedback and guidance
- 4.C Convey powerful messages using contemporary presentation techniques
- 5.A Predict how business and economic cycles could affect organizational strategy
- 5.B Construct expert knowledge from cutting-edge information
- 5.C Employ state-of-the-art management techniques
- 6.A Thoroughly examine a complex business situation
- 6.B Synthesize multifaceted information from various sources across different functional fields
- 6.C Combine different skills and management disciplines in support of interdisciplinary responsibilities

Course description

The objective of the course is to understand how to imbed sustainability into the corporate governance in line with UN sustainable Development goals and European Commission sustainable corporate governance initiative of 2021 that calls for a change in corporate governance framework to mitigate the issue of short-termism in visioning the corporate value-creation process. The course content is built on the understanding of the principles of responsibility and long-term value creation, incorporating environmental (including climate, biodiversity), social, and human factors in corporate decision making process. Topics covered include corporate responsibility and how to put the responsibility into practice, responsible executive pay and responsible investing. Course also discusses different forms of shareholder activism including voting rights, shareholder proposals, proxy fights and the evidence for their actual effects. Finally, course concludes with explaining the controversies surrounding share buybacks and how buybacks affect long-term value.

MANAGING LEARNING AND DEVELOPMENT IN ORGANIZATIONS 2725		
2023 - 2024	Credit : 6.0	IESEG - School of Management
Class code :	2324_SYL_HRM_2725	HRM

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

It is helpful, but not necessary, when student have some prior knowledge about human resource management and organizational behavior. The course will teach some new concepts but emphasizes the practical management of learning and development in organizations. For those students who wish to refresh, or did not take prior courses in this area, the professor will provide some optional material for preparation for class.

Learning objectives

- 1.B Successfully collaborate within a intercultural team
- 3.B Propose creative solutions within an organization
- 4.B Compose constructive personal feedback and guidance
- 5.C Employ state-of-the-art management techniques

Course description

Organizations' success and longevity depends on the ability to learn. Learning here refers to processes that help discovery of new knowledge, processes that lead to capturing knowledge in repositories such as systems and culture, and processes that lead to the effective use of knowledge. Underlying the ability for individuals, teams, and organizations to learn, is the effective management of learning and development by individual employees, teams, and the organization as a whole.

The overarching purpose of this course it to teach skills in the management of learning and development in and of organizations.

To this end, throughout the course, students are confronted with new knowledge in short online/e-learning modules that are completed before class-meetings with a small individual assignment. In class, students work in teams to apply this knowledge to practical problems in managing learning and development.

Assessment / Feedback

Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Type of test	Continuous assessment	Group project	Individual report											

Nb of hours if written exam														
2nd session														
Coefficient	40.0	40.0	20.0											

Evaluation

For every topic, there is an individual online preparation that includes an assignment. Students each time (week) get feedback on their score on this assignment to let them know how they are doing overall.

In class, teams of students work together on a practical management problem. The groups receive formative (non-evaluative) feedback on an initial presentation of their work. They can work on this assignment in the days following the meeting, submit, and receive their assessment.

A final paper students write individually, reflects on the learning processes they have witness throughout the course (their own and their teams'). Feedback is given on this paper in the form of a grade that reflects how well the reflection tied into the concepts and management problems learned in the course.

Recommended reading

The course will tackle 9 topics in learning and development. Each topic will include 1-2 basic articles, most often 1 scientific article and 1 more practical article like Harvard Business Review. There will be additional suggested reading for those who are interested to dive into a topic further.

Work load

Type of course	Number of hours
Interactive courses	37.0
Collective project	50.0
Individual project	13.0
E-learning	50.0

Total	157.0
-------	-------

The e-learning component, before most of the classes, contains a short individual assignment that is an important part of the preparation for in-class activities, and is therefore weighted heavily in the final grade.

NAVIGATING REMOTE WORK AND CONTINGENT WORK 2728		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_HRM_2728	HRM

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

None

Learning objectives

At the end of the course, the student should be able to:

- Understand the challenges and the benefits for remote/contingent workers and managers managing them
- Reflect on issues such as communication, identity and well-being, belongingness, alignment with organization, work-life balance, cross-cultural issues in such a context
- Appreciate what working – i.e., practices related hiring, socialization, mentoring, teamwork – in remote and contingent work contexts may entail
- Examine practices that support remote/contingent workers and coexistence of remote/contingent workers and traditional workers

- 1.B Successfully collaborate within a intercultural team
- 3.B Propose creative solutions within an organization
- 6.A Thoroughly examine a complex business situation

Course description

There has been a worldwide increase in two kinds of work: remote work and contingent work. First, remote work - working outside of the traditional office – is on rise and the Covid pandemic has only accelerated this trend. Second, workplaces increasingly have contingent workers – i.e., nonstandard work arrangements and workers such as temporary workers, part-time workers, independent-contractors, freelancers, and gig workers – who work alongside permanent employees. Given this increase, we need to prepare our managers to work in the new workplace.

Using case studies, discussions, and activities, this course aims at understanding how one can navigate the new work environment.

Assessment / Feedback

Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Type of test	Participation	Group report	Individual report

CONFLICT MANAGEMENT IN ORGANIZATIONS 2763		
2023 - 2024	Credit : 2.0	IÉSEG - School of Management
Class code :	2324_SYL_HRM_2763	HRM

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

There are no prerequisites for this course. However, the student must fully commit to the course's in-class role-playing exercises, including the previous preparation for each activity and active participation in class discussions about the exercises.

Learning objectives

By the end of this course, the student should be able to:

- (1) identify the most appropriate method of conflict resolution in different business and workplace relations and how to apply them in real-world situations.
- (2) understand how different conflict management methods can be used together in building an Integrated Conflict Management System.

- 1.B Successfully collaborate within a intercultural team
- 3.A Breakdown complex organizational problems using the appropriate methodology
- 3.B Propose creative solutions within an organization
- 4.B Compose constructive personal feedback and guidance
- 5.C Employ state-of-the-art management techniques

Course description

This course aims to give the student an overview of different conflict resolution methods to be used in the workplace, allowing the student to critically assess each technique's advantages and disadvantages.

Basic distributive and integrative negotiation concepts are reviewed to prepare students for exploring different conflict resolution methods. The main conflict resolution methods covered in the course are negotiation, mediation, arbitration, and litigation. The course also includes a general discussion of other conflict resolution methods, such as open-door policy, grievance procedures, and organizational ombudsman. The course finishes with a discussion on the possibility of combining different methods into Integrated Conflict Management Systems. Students who have already taken negotiation courses before should be aware that there will be some revision of contents covered in previous negotiation courses, so all students can be at the same level in order to understand the other conflict management techniques discussed in class.

The course relies heavily on role-playing exercises, which allow students to experience some of the strengths and weaknesses of each conflict resolution method studied. Lectures and discussions will prepare students for future activities and discuss the learnings obtained in past simulations.

Assessment / Feedback														
Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14

Type of test	Participation	Group project	Individual project											
Nb of hours if written exam														
2nd session														
Coefficient	20.0	40.0	40.0											

Evaluation

Students receive feedback from the professor and their colleagues throughout the course, especially in debriefing each role-playing exercise. In this case, feedback has collective and individual elements, as individual results and lessons learned are compared to collective results. Moreover, individual and group feedback is provided for individual and group assignments via IÉSEG-Online.

BUILDING AN EFFECTIVE POWER BASE 3295		
2023 - 2024	Credit : 2	IESEG - School of Management
Class code :	2324_SYL_HRM_3295	HRM

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Students should have a LinkedIn account and access to chatGPT. Additionally, they should be passionate and willing to learn! No specific skills required.

Learning objectives

At the end of the course, the student should be able to:

Learn how people (and yourself) can obtain (and lose) power

Learn to see the world differently: Understand how power dynamics are embedded in social interactions

Learn to act differently: Students will be asked to use the course content and apply it to their lives to increase their skills, reputation, and network

Learn to respect power. Power will change you. Gaining power has benefits and costs and it is important to develop strategies for building and exercising power that are aligned with your values

- 3.B Propose creative solutions within an organization
- 5.D Make effectual organizational decisions
- 6.A Thoroughly examine a complex business situation

Course description

This is a course about power. All organizations are political entities. Actors (people, teams, etc.) have their own perspectives and agenda. Organizational actors also differ in how much power they have to advance their agenda as well as how much influence they can exert to get ahead (and to put others down). If you want to be effective (organizationally and personally), you need to be able to map these differences, understand your own interests and objectives, and understand how to operate in a political and strategic environment. This course will help you to understand how to obtain, hold, and use power at the workplace.

From a more practical point of view, there are countless histories of very talented people who lost promotions, opportunities, negotiations, and even jobs because they did not understand the political environment of their organization. My personal goal is to make sure this does not happen to you!

The course will have 3 main evaluations

Quizzes (MCQs). One quiz covering the mandatory readings at the start of every session: 40% of final grade

Written reflections. Students will be asked to apply the content of the session and write a reflection with their experience at the end of every session: 30% of final grade

Continuous assessment + class participation: 30% of final grade

Assessment / Feedback														
Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14

Type of test	Multiple choice questions	Individual report	Continuous assessment											
Nb of hours if written exam														
2nd session														
Coefficient	40.0	30.0	30.0											

Evaluation

At the end of every course session, students will need to submit a reflection on their activity and involvement on the course. They will receive feedback at the end of the session before they submit (and/of after if needed)
Students will have the opportunity of individual coaching for the ones who need it

AMERICAN CULTURE AND CIVILIZATION 1533		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_ITC_1533	ITC

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	

Prerequisites

Students do not need to have travelled, studied or lived in the US. The main prerequisite is that they have a good level in English, and come with an open mind and a desire to participate in role plays, do research, learn and present what events have made Americans who they are today in a creative and interactive manner.

Learning objectives

- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 1.C Communicate effectively in English

Course description

Modules researched and presented by the students and the professor will include many of the following: America and its beginnings, The origins of slavery and the Civil War, Immigration, Industrialization, The Women's rights movement, Education, Health care, The Civil Rights Movement, The Death Penalty, The Right to Bear Arms. If there is time: Important artistic movements in the US, pop culture, and American history as seen through film.

RESILIENT LEADERSHIP IN INTERCULTURAL CONTEXTS 2740		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_ITC_2740	ITC

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

- Responsibility Seminar (or equivalent)
- Diversity Cluster (or equivalent)
- Why Culture Matters (or equivalent)
- Dealing with Cultural Diversity (or equivalent)
- Pre-Course Reading

Learning objectives

- To identify how global managers create frameworks that are clear enough to be understood, flexible enough to deal with diversity, and robust enough to maintain agreed standards while achieving final outcomes.
- To offer future managers an “resilience toolkit” of best practice when leading, motivating and managing multi-cultural teams.
- To map the creation of a corporate culture that sets limits on behaviour and practice, without crossing boundaries of law, ethnicity, religion, gender orientation and generation.
- To discuss mechanisms for speedy and effective dispute resolution.
- To demonstrate the fact that organisations that adopt such practices will perform better in the 21st Century than those that fail to evolve.
- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 1.C Communicate effectively in English
- 2.B Solve professional dilemmas using concepts of CSR and ethics
- 2.C Generate sustainable solutions for organizations
- 3.B Propose creative solutions within an organization
- 4.C Convey powerful messages using contemporary presentation techniques
- 5.D Make effectual organizational decisions
- 6.C Combine different skills and management disciplines in support of interdisciplinary responsibilities

Course description

This course is designed for students who are interested in developing a 21st Century leadership style that is truly international. Most large organisations reflect the cultural mores of the country from which they originate. French multinationals tend to look and feel French; US corporations are recognisably American in the way that they behave. It's a fact that has led to accusations of cultural imperialism in the past and will undoubtedly be increasingly outdated as we move forward. The main question I seek to answer is this, “how can strong leadership be provided without accusations of dictatorship (benign or otherwise)?”

Assessment / Feedback

WORKING EFFECTIVELY IN INTERCULTURAL TEAMS 2784		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_ITC_2784	ITC

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Course 2792 "Why Culture Matters" is a pre-requisit to enroll in this course.

Be open to difference and prepared to embrace diversity in all forms

Be prepared to challenge one's own deeply held beliefs and suspend judgement in situations where values may clash

It is essential to have attended a fundamental course on Intercultural communication to have a grasp of underlying concepts

Reconciling personal and cultural preferences for effective teamwork

Learning objectives

Have increased self-awareness of the role culture plays on our values and behaviours in the working environment

Analyse potentially conflictual situations and offer constructive and culturally sensitive insights

Assess different management styles as impacted by cultural elements and understand how these will affect team dynamics

and motivation Understand the importance of trust and how to build it in an intercultural environment

Draw constructive and culturally-sensitive conclusions from a wide variety of interactions

- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 1.C Communicate effectively in English

Course description

A review of basic theoretical concepts and how these impact team working

Cultural values self assessment

Recognising management styles across cultures

Analysing the impact of management techniques on trust, motivation and collaboration

Using film, simulation and case studies to apply concepts

Acquire an ability to offer constructive and culturally sensitive insights to resolve complex situations

WHY CULTURE MATTERS 2792		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_ITC_2792	ITC

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Be prepared to work in multicultural teams. Be open to call into question deeply-held assumptions, beliefs and attitudes. Being able to work in a non-judgemental fashion is an essential ingredient to succeeding in this course.

Learning objectives

Recognise the different elements that make up culture. Demonstrate the role culture plays on general and professional behaviour. Analyse the cultural elements inherent in different situations. Interact more sensitively within multicultural groups. Develop a capacity for culturally sensitive critical analysis. Sensitively interpret different elements of verbal and non-verbal communication. Clearly distinguish between objective and subjective culture. Have a greater awareness of ESRS topics such as diversity and inclusion and non-discrimination. Be able to work in an international and intercultural environment

- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 1.C Communicate effectively in English

Course description

Definitions, elements and images of culture. Objective and subjective culture. The stumbling blocks to intercultural communication. Recognising the elements of nonverbal communication. E.T. Hall's model; space, time and context. Kluckhohn and Strodtbeck's cultural orientations model. Hofstede's cultural dimensions model. Trompenaars' cultural dimensions model Cultural values Culture shock and intensity factors

PREPARATION FOR TOEFL 0494		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_LAN_ENG_0494	LAN_ENG

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	

Prerequisites

It is essential to have a good command of the English language in all of the four disciplines of Reading, Writing, Listening and Speaking before attempting the course. This means having the ability to speak about a wide range of topics, the ability to participate in an online written discussion, to be able to read, understand and analyse complicated texts on a wide variety of topics and to be able to listen to and understand lectures and dialogues at university level. It is also essential to have a wide-ranging knowledge of English vocabulary covering a broad range of academic topics as well as an understanding of the grammatical structure of sentences. The ability to make inferences, draw conclusions and identify a varied range of topics is also a prerequisite.

Learning objectives

Undertake the official TOEFL exam with confidence having practiced and built upon the necessary skills of Reading, Listening, Speaking and Writing as required for the TOEFL exam.

- 1.C Communicate effectively in English

Course description

The course provides practice in the skills required for the computer-based TOEFL, in the four areas of Reading, Writing, Listening and Speaking. It consists of a series of diagnostic tests to help identify the areas which may need extra practice and the reviewing of grammar and vocabulary specifically related to the test. There is also a series of practice tests in each of the four areas, given within the time limits imposed in the real test, to ensure good time management. It should be noted that the course is designed as a preparation course for the TOEFL Exam itself, and therefore the content is very much test based. There is a lot of work available using books from the library or information on different websites or on Iéseg online, but this is left up to the student to decide how or when to use it. The student will have an idea of the extra practice needed from the results of the work undertaken in class. Obligatory work on Iéseg online is also included.

Assessment / Feedback

Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Type of test	Continuous assessment	Continuous assessment	Individual report	Oral assessment	End of term exam	Participation	Exercise	Exercise						
Nb of hours if written exam					2.0									
2nd session														
Coefficient	10.0	10.0	15.0	15.0	30.0	10.0	5.0	5.0						

Evaluation

The lessons are based on the study, the practice and evaluation of each of the six areas of the TOEFL exam - Speaking Reading, Listening, Independent Writing and Integrated Writing, and all but the Speaking assessments take place during the exam period, Speaking being evaluated in class time. There is also a digitalized assessment online. The students receive a mark which corresponds to the mark they could expect in the official exam and they are given both group and individual feedback.

Recommended reading

There are a number of books available in the Library such as the TOEFL iBT Practice Tests LONGMAN which can be consulted in the Library ; TOEFL <http://ets.org/toefl> ; TOEFL.ORG <http://www.toefl.org> ; The students are given the address of several different websites in class. Extra practice tests and grammar exercises can be found on [léseg online](#). The students are given the address of several different websites in class. RHETORIC AND DEBATE 2750		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_LAN_2750	LAN_ENG

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Students should have a minimum level of B2 in the CEFRL (Common European Framework of Reference for Languages)

Learning objectives

At the end of the course students should be able to:

- articulate ideas with increased confidence for great oral impact with the aid of rhetorical techniques
- express ideas with increased precision
- counter an argument with skill
- demonstrate increased understanding of the importance of non verbal communication
- demonstrate understanding of constructive feedback and developed ability to offer pertinent peer feedback
- hold a clear and objective debate in English using the British parliamentary style + Paris V style
- understand the value of skills acquired for future application in teamwork and leadership contexts
- be equipped to apply these skills in professional life
- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 1.C Communicate effectively in English
- 4.C Convey powerful messages using contemporary presentation techniques

Course description

This course has a total of 16h (intensive format), composed of 4x4h interactive and engaging classes.

The objective of the course is to improve students' oral communication skills in English, providing them with rhetorical tools and language to speak comfortably and convincingly in English on a wide range of topics. Students will also be exposed to a wide range of debating formats.

Assessment / Feedback

Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14

THINKING LIKE A LAWYER - LEGAL SKILLS FOR BUSINESSPEOPLE 2747		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_LAW_2747	LAW

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Basic understanding of any legal system (sources, persons, contracts, torts).

Learning objectives

At the end of the course, the student should be able to:

Be familiar with the legal method.

Be able to understand, process and use legal information for strategic purposes.

Know how to choose the best arguments to persuade, according to the setting and audience.

Reinforce critical thinking skills.

- 1.C Communicate effectively in English
- 2.B Solve professional dilemmas using concepts of CSR and ethics
- 3.A Breakdown complex organizational problems using the appropriate methodology
- 4.C Convey powerful messages using contemporary presentation techniques

Course description

1. The legal method. Courts and the legal process.
2. How to find reliable and relevant legal information. Canons of legal interpretation.
3. Legal argumentation and argument mapping. Spotting logical fallacies.
4. Introducing and evaluating evidence.
5. Rhetoric and storytelling. Logos, pathos, ethos.
6. Legal writing techniques. IRAC and other models.
7. Negotiating like a lawyer.

Assessment / Feedback														
Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14

POWER PLATFORM: LOW CODE APPLICATION DEVELOPMENT 2722		
2023 - 2024	Credit : 4	IESEG - School of Management
Class code :	2324_SYL_MIS_2722	MIS

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

None

Learning objectives

At the end of the course, the student should be able to:

1. Perform business process and requirements analysis
 2. Explain the business value of Power Platform
 3. Use the core components of Power Platform
 4. Design and build an app to fill a real-world business need
- 1.B Successfully collaborate within a intercultural team
 - 1.C Communicate effectively in English
 - 3.A Breakdown complex organizational problems using the appropriate methodology
 - 3.B Propose creative solutions within an organization
 - 6.A Thoroughly examine a complex business situation
 - 6.B Synthesize multifaceted information from various sources across different functional fields
 - 6.C Combine different skills and management disciplines in support of interdisciplinary responsibilities

Course description

In this hands-on course, students will learn to create mobile apps without coding. The course is lab-based and focused on learning-by-doing rather than learning-by-listening.

The course introduces students to fundamental principles of low code application development using the Microsoft Power Platform. Students learn to improve business productivity by automating business processes and by analyzing and visualizing data for swift and insightful business decisions that effectively respond to changing market demands and emerging business opportunities. This is achieved by leveraging low-code platforms to create and deploy simple applications and experiences in a way that drives innovation and gains a competitive edge in a dynamic and rapidly evolving business environment.

To reinforce the concepts, the course incorporates a semester project in which students design and develop an application to meet a client's needs. Furthermore, students will prepare to take the PL-900 Power Platform Fundamentals Certification Exam. Students may choose to take the PL-900 certification exam and substitute it for their final exam.

DIGITAL TRANSFORMATION: DIGITAL DISRUPTIONS IN OUR SOCIETIES AND ECONOMIES 0570		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_MIS_0570	MIS

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	

Prerequisites

Be passionate and willing to learn. No specific skills required.

Learning objectives

Understand the challenges of the digital economy for companies and individuals: impacts of ICT on our societies, dominant role of the information, transformation of the economy in all its key processes: innovation, production, communication, distribution, consumption ...

Use of a methodological tool allowing the understanding of the value chain notion and its application to the ICT sector, Understand the technological and business innovation aspects of the Digital Economy. This will prepare students for a career in an industrial, commercial or research environment.

Acquire key knowledge regarding the fast-changing digital environment.

Understand the fundamental and significant shifts that firms will need to address over the next coming years.

Understand national and international business contexts.

Assess market conditions relevant for digital businesses.

Identify threats and opportunities for the design of relevant strategies in digital businesses

Identify and understand new business models.

Achieve an up-to-date, critical synthesis that links the various aspects of the digital economy

- 1.A Demonstrate an international mindset
- 5.A Predict how business and economic cycles could affect organizational strategy
- 5.B Construct expert knowledge from cutting-edge information
- 6.A Thoroughly examine a complex business situation

Course description

Introduction to ICT + ICT figures

Context: a profound evolution of our society and economies + Central role of the information + Consequences of that revolution

Understanding Millennials and their main expectations

Value chain analysis + Interrelations of the market players: the percolation paths.

8 major impacts and challenges:

1. Technology (Cloud computing, IoT, Big Data, Open Data).

Technology re-imagines : Communication, Transport & Mobility, Business processes, Music consumption, Personalization, Just in time, Commerce, Content, Reviews, Travels, Voice, News

2. Information and knowledge (ICT: new testing ground for innovative teaching formats for the transmission of knowledge),

3. Economy (Internet contributions to sectors using it),

4. Digitalization (Development of new consumption patterns & new business models),

5. Regulation (People & Regulation / Policies should evolve to adapt to a more connected society - GDPR),

6. Human & Social (Permanent connection reconfigures spaces and times: private and family life, professional life, private life and digital identity, social life + health impacts and Digital Detox),

7. Organizational (Changes in company organization, effects of globalization).

Series of use cases of sustainable use of digital will be presented and debated in class - this will require student involvement (graded 30%).

In parallel during class, a group project will be conducted along the 4 days of class to apply core concepts of the course, this will require personal work to to research on your own ideas of Sustainable Digital Innovation (graded 50%).

After the end of the intensive week, student will have to write a report weighting pro's and con's of a sustainable digital innovation which will require research, writing & reading work (graded 20%).

TECHNOLOGY AND STRATEGY 2745		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_MIS_2745	MIS

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Some basic knowledge on information technology and business strategy would be very helpful.

Learning objectives

- Understand the impact of information technology upon business model (strategy)
- Understand the role of information technology in businesses to gain competitive advantage
- Understand aligning information technology and business

- 1.B Successfully collaborate within a intercultural team

- 1.C Communicate effectively in English

- 6.B Synthesize multifaceted information from various sources across different functional fields

Course description

This course of management information systems examines the role and impact of information technology upon strategy, and highlights the alignment of information technology strategy with business strategy in order for businesses and organizations to gain competitive advantage. It explores the questions faced, the frameworks applied, and the decisions made by business and technology leaders for strategic purposes.

APPLIED MARKETING ANALYSIS 2754		
2023 - 2024	Credit : 6.0	IESEG - School of Management
Class code :	2324_SYL_MKT_2754	MKT

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Students should be knowledgeable about basic concepts in statistics. Some knowledge of Marketing Research is also recommended.

Students must have access to either a Windows or Apple laptop that can support SPSS version 27 or higher and that they can bring to class.

Learning objectives

At the end of the course, the student should be able to :

1. Have a deeper understanding of the different data analysis techniques available;
2. Understand the use of these different data analysis techniques for marketing-oriented research and business problems;
3. Identify the relevant statistical test(s) to perform;
4. Apply the different data analysis techniques and interpret the results of statistical outputs;
5. Know how to use a data analysis software such as SPSS.
6. Be able to communicate about and present statistical results in a clear and proper way.

The main learning objectives addressed in this course therefore are: master the appropriate techniques, and analyze and solve problems with the appropriate methodology.

- 1.B Successfully collaborate within a intercultural team
- 1.C Communicate effectively in English
- 3.A Breakdown complex organizational problems using the appropriate methodology
- 3.B Propose creative solutions within an organization
- 4.C Convey powerful messages using contemporary presentation techniques
- 5.B Construct expert knowledge from cutting-edge information
- 6.A Thoroughly examine a complex business situation

Course description

The course of Advanced Data Analysis is a statistical course that focuses on different data analysis techniques, that will be applied in a marketing context. Students will learn when and how to use these different techniques, as well as how to report and present results of statistical analyses in a professional manner.

To get acquainted to this, students will perform several exercises in class using the data analysis software SPSS (in-class assignments), and solve a challenging business case in groups based on real-life data (group project). The course focuses on the application of data analysis techniques for real business purposes, and more specifically, marketing-oriented ones. The course will cover the following topics: Introduction to the SPSS environment (data preparation, dealing with missing data, exploring data with graphs...), hypothesis testing, descriptive analysis, statistical tests (Chi-square, T-Test, ANOVA, regression...), mediation, moderation.

Assessment / Feedback

CONSUMER BEHAVIOR: NEW TRENDS 2765		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_MKT_2765	MKT

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Principles of Marketing / Fundamentals of Marketing / Art and Science of Marketing (whichever applies depending on the program)

Learning objectives

The objective of this module is to introduce students to the multitude of influences that consumers are exposed to on a daily basis in their regular consumption endeavors.

Concrete topics are as follows:

1. Consumer decision making: cognition, perception, motivation
2. Personal influences
3. Social influences
4. Cultural influences
5. Sustainable consumption, & responsible marketing trends

- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 5.B Construct expert knowledge from cutting-edge information
- 4.C Convey powerful messages using contemporary presentation techniques

Course description

Successful marketing nowadays is all about the creation of customer value and engagement within a fast-changing, increasingly digital and social marketplace. Consumer behavior is a multifaceted area that incorporates elements of psychology, sociology, anthropology, cultural studies, neuroscience, digital innovation, and many other fields that make it a vibrant, exciting and enriching field. In this course, students will have the opportunity to apply theoretical models and frameworks to practice using various tools; including short exercises and assignments, conducting research to identify relevant industry examples, evaluating high-quality case studies that demonstrate key learning points, and engage in active discussions.

Assessment / Feedback														
Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14

CROSS CULTURAL MARKETING 3160		
2023 - 2024	Credit : 2	IESEG - School of Management
Class code :	2324_SYL_MKT_3160	MKT

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Students should have the ability to do high-quality secondary research.

Further, they should have strong analytical skills to analyse situations and arrive at creative solutions as well as the ability to do teamwork.

Reading in advance is required: academic papers and case studies.

Learning objectives

- Identify the key characteristics of cross-cultural markets that are of importance to international marketers and derive implications for marketing to these markets.
- Develop an integrated view of cross-cultural markets in terms of their operating environment and consumer behaviour.
- Develop a set of recommendations for the development and/or introduction of products and services in these markets.
- Assess and synthesise information from various sources and about different fields.
- Analyse and evaluate the relative importance of the cultural element to work in multicultural environments.
- Demonstrate an intercultural open mindset and work efficiently in an international professional environment.
- Make a professional quality oral presentation by using digital tools and based on academic references.

- 1.A Demonstrate an international mindset

- 1.B Successfully collaborate within a intercultural team

- 1.C Communicate effectively in English

- 2.A Assess the values of the organization in which they work

- 2.B Solve professional dilemmas using concepts of CSR and ethics

- 2.C Generate sustainable solutions for organizations

- 4.A Appraise the performance of a team

- 4.B Compose constructive personal feedback and guidance

- 5.A Predict how business and economic cycles could affect organizational strategy

- 6.C Combine different skills and management disciplines in support of interdisciplinary responsibilities

Course description

The course enables students to understand the particular challenges and opportunities which cross-cultural markets present for international marketers while focusing on marketing aspects (e.g. 4Ps, PEST analysis). In the first instance, the particular context characteristics of cross-cultural markets will be considered, and students, in multicultural teams, will apply this knowledge to research a specific cross-cultural market. Then, the marketing challenges relating to entering and developing products for cross-cultural markets will be considered.

Cross-cultural market strategies will be analysed. The particular role of technology and its disruptive use in these types of markets will be considered. Students will reflect on what responsible marketing in cross-cultural markets might entail.

Industry insights (via case studies) will provide concrete examples of how, in practice, they enter and compete in cross-cultural markets.

Assessment / Feedback														
Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Type of test	Multiple choice questions	Group project	Group report											
Nb of hours if written exam														
2nd session														
Coefficient	20.0	30	50											

Evaluation

The course uses three assessment mechanisms:

In-class contribution and test: 20%

Group presentation: 30%

Group report: 50%

WEB MARKETING 3164		
2023 - 2024	Credit : 2	IESEG - School of Management
Class code :	2324_SYL_MKT_3164	MKT

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Students should have some general knowledge about Internet, social media and marketing basics.

Learning objectives

Through their group projects and the study of digital marketing cases, students will get to have a better understanding and knowledge of the digital marketing strategies of global brands. They will work in multicultural teams, combine their business knowledge with newly acquired digital marketing skills, and consider business strategy as a whole, providing creative digital marketing plans and ideas.

- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 3.A Breakdown complex organizational problems using the appropriate methodology
- 3.B Propose creative solutions within an organization
- 6.A Thoroughly examine a complex business situation
- 6.C Combine different skills and management disciplines in support of interdisciplinary responsibilities

Course description

The course will be based on lectures, outside readings, in-class exercises and a group project.

Session 1 : Introduction to the course

What is Web Marketing and its tools. How do they integrate within an overall marketing strategy?

Overview of Web marketing

Definition of image and branding / Managing visibility

Sales Funnel

Digital Transformation & e-commerce

UX & UI

CONTENT STRATEGIES IN SOCIAL MEDIA 3176		
2023 - 2024	Credit : 2	IESEG - School of Management
Class code :	2324_SYL_MKT_3176	MKT

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Marketing Fundamentals (strategic marketing & mix marketing)

Learning objectives

The main objectives of this course are the following:

- 1) Identify the main strategic pillars of a brand
 - 2) Understand the characteristics of the existing social media platforms
 - 3) Remember the different steps to implement a content strategy on SM
 - 4) Propose (and implement) an efficient content strategy for a specific brand
- 2.C Generate sustainable solutions for organizations
 - 3.B Propose creative solutions within an organization
 - 4.C Convey powerful messages using contemporary presentation techniques

Course description

The fourth industrial revolution includes digital transformation that has been undertaken by most (if not all) companies to remain competitive and to adapt to the evolving business environment . The impact of digital on media is part of digital transformation. Thus, the media environment has become more and more complex and brands are challenged to grab their audience's attention. In this context , publishing content has turned to be a big part of brands' activity on social media , mainly because they were expanding their presence on social media, and because they needed to nurture their platforms. The main purpose of this course is to provide students with the relevant knowledges to identify the characteristics of the available social media platforms (how can they be part of your communication strategy ?), as well as to be able to propose an efficient content strategy to a given brand, according to its strategic pillars.

Assessment / Feedback

Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Type of test	Group project	Participation												
Nb of hours if written exam														
2nd session														

Coefficient	80.0	20												
-------------	------	----	--	--	--	--	--	--	--	--	--	--	--	--

Evaluation

Students will build a project on a specific brand. They will progress on the project in each session we will have together. They will finally present their work to the class and send a written report to the professor. Individual participation to the course will also be assessed.

Get the relevant information and the adapted tools to know what a resource effectively costs and recommend or take appropriate decisions in given business circumstances. 5B

Integrate the supplier's management into the full vision of the company they are working in. 1B - 6B

Value the potential of efficient relationships with suppliers, while remaining ambitious and strong. 1A

See the supply chain as a permanent challenge to increase productivity and market shares. 6C - 6E

Consider the administrative, legal work as a necessity in the purchasing process.

Integrate social compliance as fully part of the business challenges today. See the green economy as a necessity to be creative. 2B - 2C

Explain how and why a company is strong or weak depending of its supply chain management. 2A - 7B

Understand the upheavals generated by Covid 19 crisis and its concrete impacts on strategic and daily purchasing. 5A - 5C

List the risks for a company in case of degradation or failure of a supplier and have a reflection about the consequences on a business model. 1B - 6A

- 6.C Combine different skills and management disciplines in support of interdisciplinary responsibilities
- 5.C Employ state-of-the-art management techniques
- 6.A Thoroughly examine a complex business situation
- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 2.A Assess the values of the organization in which they work
- 2.B Solve professional dilemmas using concepts of CSR and ethics
- 2.C Generate sustainable solutions for organizations
- 5.A Predict how business and economic cycles could affect organizational strategy
- 5.B Construct expert knowledge from cutting-edge information

- 6.B Synthesize multifaceted information from various sources across different functional fields
- 3.B Propose creative solutions within an organization

Course description

COVID 19 AND NEXT: Let's have a look on how the sanitary crisis has disrupted the supply chain and thus the purchaser's job and lead to a more and more unpredictable world.

SOURCING : How to search, evaluate and start working with a supplier.

LOGISTIC : Transport and customs are fully part of the purchasing process. And has become very sensitive over the last months.

COST CALCULATION : From buying price to total cost of ownership.

PURCHASING RESPONSIBILITIES AND RISKS : New technologies magnify the opportunities and open the door to unexpected dangers.

SUPPLIER RELATIONSHIP : A mix of human relationships, ratio of power and negotiation with the necessity to bring profit while respecting the company's strategy..

GROWING TOGETHER. The business requirements keep on evolving and the most successful companies have the right suppliers to move on. Challenging suppliers goes beyond prices : certification, adaptation, trainings...

PSYCHOLOGY OF THE NEGOTIATOR 2755		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_NEG_2755	NEG

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

none

Just the desire to work interactively and constructively!

Learning objectives

- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 2.C Generate sustainable solutions for organizations
- 3.B Propose creative solutions within an organization
- 4.B Compose constructive personal feedback and guidance
- 6.C Combine different skills and management disciplines in support of interdisciplinary responsibilities

Course description

The essence of the subject is to introduce students to the world of negotiation and explain the structure and details of negotiation.

Whilst centered on business negotiation theory the subject will also look at game theory, conflict resolution and intercultural negotiation. The essential business negotiation dimensions include: Planning, preparation, strategies, that go with a successful negotiation. Negotiation tactics, win-win strategy etc...

GEOPOLITICS 2782		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_NEG_2782	NEG

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

None

Learning objectives

Identify the bias that can influence analysis and decision-making
 Distinguish facts (established and verified) from opinions in the selection of informations/data

- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 3.B Propose creative solutions within an organization
- 6.A Thoroughly examine a complex business situation
- 6.B Synthesize multifaceted information from various sources across different functional fields
- 5.C Employ state-of-the-art management techniques
- 5.B Construct expert knowledge from cutting-edge information

Course description

After a presentation of Geopolitics, the students will be asked to analyze a recent conflict, in class. This case study will present the method of analyzing a conflict: collecting data, context, key players, evolution, etc. A feedback from the case study will then be conducted with the students, it will allow them to reflect on bias in analysis (and their consequences) and the difficulty of selecting information. Finally, examples of companies facing geopolitical situations will be presented to the students, in an interactive way.

Assessment / Feedback														
Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Type of test	End of term exam	Group project	Participation											
Nb of hours if written exam	3.0													
2nd session	true													
Coefficient	50.0	40.0	10.0											

Evaluation

The students will mostly work in class through case-studies and discussions. They will be advised to read their notes and study some geopolitical situations/crisis to prepare for the evaluation - some readings might be given, if necessary, at the end of the course to help them prepare for the evaluation.

A report of the evaluation will be given to the students with the answers and general comments on the students' work. Each student will receive an individual report as well. The teacher remains at the disposal of the students for any questions, requests for information, advice ...

Recommended reading

A few excerpts from key authors will be studied and delivered directly to the students in class.

The course will focus on presenting Geopolitics in an operational manner as to show what it can bring in the day-to-day running of a company, what it can bring to decision-making. Therefore, most of the readings will be about conflicts studied with the students, in class.

SUSTAINABLE SUPPLY CHAIN MANAGEMENT 2744		
2023 - 2024	Credit : 6.0	IESEG - School of Management
Class code :	2324_SYL_OPS_2744	OPS

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

None.

Learning objectives

At the end of this course, students should be able to:

- analyze and comprehend life cycle analysis reporting
- recognize the factors that enable sustainable supply chain operations, including both environmental and social aspects
- understand the costs and benefits of production and inventory management systems
- diagnose supply chain designs relative to risk and resilience considerations

- 2.C Generate sustainable solutions for organizations

- 3.A Breakdown complex organizational problems using the appropriate methodology

- 6.B Synthesize multifaceted information from various sources across different functional fields

Course description

Course sessions address the following topics:

- life cycle analysis
- sustainable procurement
- sustainable transportation
- sustainable production
- sustainable warehousing and inventory management
- closed-loop supply chains
- supply chain risk management

Assessment / Feedback														
Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14

DIGITAL OPERATIONS MANAGEMENT 2791		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_OPS_2791	OPS

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Students should have a

- a) good command of English (listening, speaking, writing, and understanding);
- b) primary interest and background knowledge in the fields of Operations and Supply Chain Management; and
- c) working knowledge of quantitative approaches in business administration, including algebra, statistics, and computer software (e.g., Microsoft Office).

Learning objectives

Technological advances, globalization, trade liberalization, and increased regulation have shaped our daily lives and supply chains worldwide in the past four decades. This course serves as an introduction to the topics of Digital Operations/Supply Chain Management, Behavioral Operations Management, and their interaction. The course aims to introduce students to (1) the impact of digitalization and (2) the role of human behavior on operational and supply chain processes and decisions.

At the end of the course, students:

- a) understand the impact of digitalization on operations and supply chain management processes;
- b) know the field of Behavioral Operations Management and the influence of behavior on operational decisions; and
- c) discuss the connections between the latest trends in digital operations and real-life company examples.

- 4.C Convey powerful messages using contemporary presentation techniques
- 6.A Thoroughly examine a complex business situation
- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 1.C Communicate effectively in English
- 5.C Employ state-of-the-art management techniques
- 6.B Synthesize multifaceted information from various sources across different functional fields
- 6.C Combine different skills and management disciplines in support of interdisciplinary responsibilities
- 5.B Construct expert knowledge from cutting-edge information

Course description

Digital Operations Management 2791 is an intensive course associated with 2 ECTS. The 16 class hours correspond to 4 interactive/lecture sessions of 4h20 minutes (including two 10-minute breaks). These interactive/lecture sessions are regular classroom sessions. These sessions will be delivered using a blend of formal lectures, in-class exercises, case discussions, and games/experiments.

Assessment / Feedback

Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14
Type of test	End of term exam	Group report	Presentation											
Nb of hours if written exam														
2nd session														
Coefficient	60.0	20.0	20.0											

Evaluation

There are three main summative feedback/assessments in the course:

1. Final Exam (60%);
2. Final Group Report (20%); and
3. Final Group Presentation (20%).

Formative feedback/assessments are provided ear the end of session 1, 2, and 3 to the groups in preparation for their final group reports and presentations.

Recommended reading

The necessary Literature and case readings will be introduced in class. The following textbooks are also relevant to the course:

MacCarthy, Bart L, and Dmitry Ivanov. "The Digital Supply Chain—Emergence, Concepts, Definitions, and Technologies." In The Digital Supply Chain, 1st ed. Elsevier, 2022.

Pellicelli, Michela. The Digital Transformation of Supply Chain Management. 1st ed. London: Elsevier, 2022.

GLOBAL SUSTAINABILITY & OPERATIONS MANAGEMENT 3161		
2023 - 2024	Credit : 2	IESEG - School of Management
Class code :	2324_SYL_OPS_3161	OPS

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	

Prerequisites

English Speaking, Learning and Presenting Skills

Learning objectives

- A general understanding of the impact on global sustainability of any operational decision
 - A general understanding of internal and external organizational and operational sustainability. Tools and initiatives to achieve and maintain sustainability
 - Gain an understanding of circular economy through strategic sustainable initiatives
 - Incorporating CSR and ESG in organizations to make a local, domestic and global social impact through tackling people and environmental issues; Usage of metrics
 - Understanding and befitting the Sustainable Development Goals into the framing of Domestic and Global Business Strategies and Initiatives
-
- 5.A Predict how business and economic cycles could affect organizational strategy
 - 5.B Construct expert knowledge from cutting-edge information
 - 1.A Demonstrate an international mindset
 - 1.B Successfully collaborate within a intercultural team
 - 1.C Communicate effectively in English
 - 2.B Solve professional dilemmas using concepts of CSR and ethics
 - 2.C Generate sustainable solutions for organizations
 - 3.B Propose creative solutions within an organization
 - 4.C Convey powerful messages using contemporary presentation techniques
 - 6.B Synthesize multifaceted information from various sources across different functional fields
 - 6.C Combine different skills and management disciplines in support of interdisciplinary responsibilities
 - 2.A Assess the values of the organization in which they work

OPTIMIZATION TECHNIQUES 2732		
2023 - 2024	Credit : 6.0	IESEG - School of Management
Class code :	2324_SYL_QMS_2732	QMS

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

In this course students are expected to have previously completed basic courses in calculus and linear algebra. Knowledge in statistics, programming and algorithms will be helpful.

Learning objectives

The first part of the course is oriented to linear algebra and the analysis of the different mathematical programming modelling strategies. The second part of the course focuses on linear programming algorithms and provides students with computational tools to correctly solve the designed linear programming models for economics, business and management. At the end of the course, the student should be able to: - understand basic theoretical principles in optimization; - understand formulation of optimization models; - understand solution methods in optimization; - understand methods of sensitivity analysis and post processing of results - apply optimization techniques to a wide range of business problems - implement practical cases, by using the Excel solver.

- 1.A Demonstrate an international mindset
- 1.B Successfully collaborate within a intercultural team
- 1.C Communicate effectively in English
- 5.B Construct expert knowledge from cutting-edge information

Course description

The goal of this lecture is to allow students to master tools that they will meet in companies to solve a practical problem. Emphasis is put on being able to model the problem and understand the main algorithmic aspects that facilitate the interpretability of the solution.

Linear programming and the simplex method will be the main part of the course. A special attention is devoted to stochastic programming and decision analysis

PREDICTIVE ANALYTICS FOR BUSINESS 2736		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_QMS_2736	QMS

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

Students should be aware of some basic concepts in statistics (variance, cross tables, conditional probabilities), management (marketing) and micro-economy. They also can be informed with multivariate descriptive basic algorithms (PCA, linear model) or have ideas on these topics. It is also established that this course is well designed to deal with statistics since it brings new views on all statistics questions. In short, welcome to all.

Learning objectives

Overview : AI, Data Science & Data driven decision for business

- Build a data based predictive strategy, formalize a scoring problem
- Carry out a research relying on various methods including Neural Networks, Logistic and Decision Trees.
- Evaluate performance, control reliability and accuracy of a score, calculate expected ROI

This course aims at giving students a global contractor's competence AND basic autonomy to address a scoring issue

- 3.B Propose creative solutions within an organization

Course description

Predicting human behaviour with data is the question addressed by all "big data" or Machine Learning methods - Associations rules, Neural Networks, Random Forests ... These methods involve many fascinating issues. Most of them will be argued: expected value and business goals, quality assessment, real or apparent performances and even pathological data ... This course provides a detailed step-by step methodology to deal with real world data predictive problems.

ECONOMETRICS OF QUALITATIVE VARIABLES 2789		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_QMS_2789	QMS

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

- Basic Descriptive and inferential statistics
- Introduction to Econometrics (linear regression)

Learning objectives

1. Introduction: the art of econometrics
 2. The linear probability model
 3. The logit model
 4. Model fit and various tests
- 3.A Breakdown complex organizational problems using the appropriate methodology
 - 3.B Propose creative solutions within an organization
 - 5.A Predict how business and economic cycles could affect organizational strategy
 - 5.C Employ state-of-the-art management techniques
 - 5.D Make effectual organizational decisions
 - 6.A Thoroughly examine a complex business situation
 - 6.B Synthesize multifaceted information from various sources across different functional fields

Course description

The Econometrics of Qualitative variables course focuses on the analysis and prediction of binary (yes/no or 0/1) dependent variables. It might be seen as a fundamental step toward Big Data and Machine Learning as it covers foundations of many other algorithms.

The first part is a brief review of the Introduction to Econometrics course (the case of quantitative dependent variables) and explains why such an approach is limited.

The second part discusses an adaptation of the traditional OLS regression called the Linear probability model. Given the drawbacks of this model, the third part is based on the Logit model which is the recommended tool to predict such variables. The lecture introduces all elements needed to construct this model.

The last part is based on evaluating the quality of logit models through hypotheses testing.”

The course includes in-class interactive exercises and applications using Excel and then SPSS software.

MANAGING NON-PROFIT ORGANIZATIONS: CSR & SPONSORSHIP STRATEGIES 2731		
2023 - 2024	Credit : 2.0	IESEG - School of Management
Class code :	2324_SYL_STS_2731	STS

Level	Year	Semestre	Campus	Language of instruction
Bachelor	-	S6	L / P	English

Prerequisites

No prerequisite.

Knowing the CSR stakes is an advantage. The commitment or knowledge of an NGO/NPO by the students will help. The course will give them the opportunity to work directly on the financing and stakes of the relations with corporates and foundations for THEIR project.

Learning objectives

After having followed this course, the students will be able to:

- understand the motivations of NGO/NPOs,
- master the legal and fiscal frame of sponsorship.

More precisely, they will be able to:

- target, prospect, meet, convince corporates and foundations,
 - write a sponsorship argument that responds to the private financiers' expectations
 - hear the stated and not-said expectations of corporates, convert them into meaningful projects,
 - conclude and contractualize with private financiers,
 - co-build, animate and sustain long term sponsorships.
- 2.A Assess the values of the organization in which they work
 - 2.B Solve professional dilemmas using concepts of CSR and ethics
 - 2.C Generate sustainable solutions for organizations
 - 3.A Breakdown complex organizational problems using the appropriate methodology
 - 3.B Propose creative solutions within an organization
 - 4.C Convey powerful messages using contemporary presentation techniques
 - 6.C Combine different skills and management disciplines in support of interdisciplinary responsibilities

Course description

The course follows the following programme:

- Innovating financings and partnerships between corporates and NGO/NPOs,
- Context of sponsorship, definitions, added values, goals and motivations of corporates, legal and fiscal frame,
- Building an argument,
- Communication, set up of the sponsorship brochure,
- Approach of corporates and foundations,
- Finalization of the argument, formalization of the sponsorship brochure,
- Oral presentation in a role game, action plan to approach corporates.

Assessment / Feedback

Rated element	1	2	3	4	5	6	7	8	9	10	11	12	13	14
---------------	---	---	---	---	---	---	---	---	---	----	----	----	----	----

Type of test	Participation	Oral assessment	Group report											
Nb of hours if written exam														
2nd session														
Coefficient	30.0	35.0	35.0											

Evaluation

The oral presentation is a role game, the simulation of a real-life professional situation of the NGO/NPO organization in front of a corporate meeting. All the students of the sub-group take part to it. They are evaluated on individual and collective speech, as well as on assessment of learnings in questions-answers in front of the group. The evaluation session provides a pedagogical feedback to the students.

The written exam is formed by the production and restitution of a sponsorship brochure and an action plan for the sponsorship strategy.
