RESEARCH SEMINAR

EMPOWERING CHANGEMAKERS FOR A BETTER SOCIETY

BIO

Natalia Levina is a Professor of Information Systems and George & Edith Heyman Faculty Fellow at New York University (NYU) Stern School of Business. Professor Levina's main research interest is in understanding how people span organizational, professional, cultural, and other boundaries in the process of building and using new technologies. She uses qualitative field work as well as computational research methods and diverse organizational theories in her work.

Her current research projects focus on understanding AI adoption in professional work, knowledge integration and governance processes in crowdsourcing communities, and diverse impacts of blockchain technologies on society. Her research has been published in Information Systems Research, MIS Quarterly, Organization Science, Journal of Management Information Systems, Academy of Management Journal, Harvard Business Review, and other outlets.

She currently leads Ph.D. program in Information Systems and has previously served as the inaugural director of the Fubon Center for Technology, Business, and Innovation. She was also appointed Distinguished Research Environment Professor at Warwick Business School. Professor Levina teaches undergraduate, MBA, and EMBA courses on digital strategy and innovation as well as a doctoral seminar on technology in organizations.

Professor Levina received her B.A. in Computer Science and Mathematics and M.A. in Mathematics from Boston University. She received her Doctor of Philosophy in Information Technology from Massachusetts Institute of Technology's Sloan School of Management.
